 - e. WIPE

Total Funding Potential: 250K+

Terms

- RM = Relationship Manager
- EX = Experian
- EQ = Equifax
- TU = TransUnion
- BLOC = Business Line of Credit

Total Funding Projection – \$250,000

By following this updated sequence and strategically wiping inquiries at each stage, you can position clients to maximize their approvals. While not guaranteed, this system has been proven to yield strong results when executed correctly.

Strategic Considerations

Consider this sequence as a well-thought-out example that could serve as a strong starting point.

It's crafted to show you an effective way to begin, but keep in mind that everyone's financial situation is different. You might need to tailor this example to fit each clients' needs and credit profile.

The steps and timing here are designed to be effective, but they should be considered as a flexible guide to adapt to each particular situation, rather than an exact blueprint that works for everyone.

Remember to

- Monitor credit diligently throughout the process.
- Remove inquiries from the credit report between rounds as advised.
- Work with Relationship Managers (RM) when possible to negotiate higher limits.
- Be prepared to provide additional verification or conduct follow up calls during each round.
