

ADMIN DASHBOARD DATA SYSTEM SPEC

This entire system will live in the ADMIN DASHBOARD only.

However, the admin dashboard will also collect and pull data from the CLIENT DASHBOARD / CLIENT PORTAL.

Clients submit data through onboarding forms and portal inputs.

Admin dashboard is the internal system that stores, analyzes, and learns from all data.

DATA SOURCES:

- Client onboarding forms
- Client dashboard inputs
- Credit analyzer data
- Admin manual inputs
- Bank application records
- Approval / denial outcomes

STATE DATA REQUIREMENT:

For every client, store:

- State
- (Optional) City

WHY STATE MATTERS:

- Impacts bank strategy
- Impacts underwriting patterns
- Used for filtering and reporting
- Used in recommendation engine

ADMIN CAPABILITIES:

- Filter clients by state
- Compare approvals by state
- Compare bank performance by state
- Use state in future recommendation logic

SYSTEM STRUCTURE:

Client Dashboard = Data Entry

Admin Dashboard = Command Center

The goal is to:

- Collect structured data
- Analyze patterns across clients and banks
- Improve funding outcomes over time
